

XR Rig Simulator Keyboard Shortcuts

Overview

Since there are three devices in VR, all of which can be simulated independently, the process for using the rig simulator is:

- Step 1: Activate the device you would like to control – multiple can be selected at once
- Step 2: Use the control(s) for that device

Use the shortcuts for Step 1 and Step 2 (A and B) below as reference.

1. Activate devices

Left controller	Headset	Right Controller
Hold Left Shift or toggle with T	Hold Right-click	Hold Spacebar or toggle with Y

2A. Basic controls

Pan	Move mouse
Rotate	Hold middle mouse
Inverse controls	R
Reset transform	V
Snap turn	A [left] or D [right] (with controller active)

2B. Input controls

Grip	G
Trigger	Left-click
Primary Button	B
Secondary Button	N
